SUPERB FLOWER DRAWINGS.

76 **Catrani** (Balthasar) STIRPIUM IMAGINES LXXV quas ex Horto Patavino delineavit et vivis coloribus ad naturam fidelissime expressit Balthasas Catrani Romanus curante et dirigente Joanne Marsilio Botanices Professore ejusdem Horti Prefecto. 1776. Folio, half green morocco.

Collection of 76 magnificent watercolour drawings of flowers each within a pen border. The drawings were executed at the celebrated Botanic Garden at Padua by one Balthasar Catrani, apparently a student under the naturalist Marsilgi, then professor of botany. There is a list of the plants shown, so that we have here a fully documented Herbarium of the 18th century.

Both for draughtsmanship and colour these drawings belong to the finest offered for sale in recent years and have the advantage over most collections offered that the MS. is fully documented.

In perfect state of preservation.
